

Seriously Kids™

Supporting, educating, empowering.... Seriously useful

An All About Me form allows personalised information about the child from the child's perspective.

Please Note: This form provides the platform to share what is important to the kids.

ALL ABOUT ME

An All About Me form allows personalised information about the child from the child's perspective.

It is a great tool that allows the child to have their voice heard and we can learn more about them. It is particularly helpful for a child to complete one of these forms if there is a new nanny or a relief carer to care for the child/ren. In this instance it can be an invaluable reference point for carer to learn more about the child.

This form of communication allows the child to have some involvement (age appropriate) and hence feel some ownership in the new situation and feel valued. It is their way of expressing themselves and it shows you respect them and value their likes, dislikes, etc. It shows that you want to know more about them.

Not all children will be able to complete these forms, depending on the age such as a baby, then the parent can fill it out on their behalf as it is still sharing of individual information that is useful knowledge about the child.

The All About Me focuses on learning about the child in a positive way. It quickly provides the ability to learn vital points about the child/ren which facilitates the development of a supportive relationship right from the beginning. It helps to build, and foster, a positive relationship which in turn supports a child development.

All kids need the basics....food, warmth, shelter and clothing but they also need care, love, attention, security and consistency. This form provides the platform to share what is important to them.
